This is a very brief analysis of each of the product and a more in-depth analysis ought to be sort (particularly of the price). We are trying to make a realistic comparison between our software and our competitors - but do not take this list as authoritative - make your own judgements. We have endeavoured to make this as accurate as possible - but no responsibility can be borne by us in relation to any inaccuracies that might be contained here-in.

Key

▪	Don't Know
*	smr - some macros removed
**	must be very expensive

Conclusion

From what we can glean from the advertisements of other software providers - None of our competitors provide what we provide, they either provide the financial aspects of the software or the electrical certification side of the software.

This makes our product unique. Our nearest competitor on price is HollyCroft, but to our knowledge they don't include any financial aspects to their software.
